Propane Tanks

DANGER!! NEVER PLACE PROPANE TANKS IN RECYCLING BINS!

Tank manufacturers recommend that consumers return unusable propane tanks to a local distributor. Please check your tank for the 'manufacturer's tag' as a source of contact/disposal information.

We recommend considering alternatives to small, non-refillable propane cylinders due to the difficulty in disposal of these items.

Please view the **Wisconsin Propane Gas Association** webpage for safety and disposal information.

The following dealers dispose of old propane tanks; some take empty tanks only. Please check with companies for **fees** and/or changes in their policy.
